Applicant

# WORK DETAILS

## SOFTWARE ENGINEER

RidgeTech Simplified Solutions, Inc.  
Morong, Rizal, Philippines

- Made various user interfaces and features with front end web technologies
- Modified and developed in-house libraries, classes and reusable components using JavaScript and C#
- Arranged backend code that communicates with SQL databases, REST APIs and building automation servers/devices
- Wrote algorithms to manipulate and process raw data into desired formatting as required by the business logic
- Designed and developed some websites
- Created and modified database structures
- Wrote numerous user manuals and documentations
- Trained and supervised over 30 interns in front end web development during their on-the-job training
- Traveled to Japan with colleagues to personally work with business partners for their development needs

## SOFTWARE DEVELOPER

Bluekei Soft, Inc.  
Eastwood Ave, Quezon City, Philippines

- Implements designs based on mock-ups
- Develops reusable components, classes, functions and libraries
- Creates frontend features and functionalities
- Writes backend code to process data and communicate with external API services or directly with databases
- Designs code structures and architectures for prototyping
- Maintains support on existing projects
- Monitors, manages and collaborates work using various productivity tools and platforms
- Sets up development and testing environments on both macOS and Windows
- Performs technical research and studies new technologies
